

Betel Leaf Disease Detection Report

Prediction: Dried_Leaf

Date: 2025-12-10 15:56:22

Recommended Solution:

Cause of **Dried Leaf Problem**

- Insufficient watering or irregular watering schedule.
- Excessive sunlight causing leaf burn.
- Lack of essential nutrients (Nitrogen, Potassium).
- Poor soil moisture retention.
- Sometimes due to fungal infection or root damage.

Solution for **Dried Leaf Problem**

- Increase watering frequency (avoid over-watering).
- Apply balanced fertilizers.
- Improve soil moisture retention using mulch.
- Protect from excessive sunlight.
